Objective

I seek challenging opportunities where I can fully use my skills for the success of the organization.

Education

- **BUDS Foundation English Medium High School** 2020
SSLC
85.12%
- **BGS SC PU College, Pandavapura, Mandya DT** 2022
P.U.C
78.5%
- **CIT , Mandya , VTU** 2025
B.E , CSE
7.7 cgpa

Skills

- Programming language: Java , C, JavaScript, Python
- Frontend Technology: HTML, CSS, React.js
- Backend Technology: Node.js, Express.js
- Basic computer skills
- Database: MongoDB
- Tools and Platforms: Git, GitHub, VS code, Postman, Netlify
- Core Concepts: Responsive Web Design

Projects

- **Online Shopping Portal (Mini Project)**
Developed a web-based portal to simulate an e-commerce system where users can browse product's, add items to the cart, and place orders. Implemented basic authentication and database connectivity to store user and product details.
- **Dynamic Urban Evaluation Routing Protocol for Enhanced Vehicle Ad Hoc Networks (Main Project)**
Currently working on designing a novel routing protocol to improve data transmission efficiency in vehicle-to-vehicle communication within urban areas. The project leverages machine learning -based evaluation metrics to enhance route stability, reduce packet loss, and ensure low-latency communication in VANET environments.
- **Movie Booking System - Book My Show Clone**
Production - oriented backend system for a movie ticket booking application similar to Book My Show. Supports two actors - Customer (register, OTP verify, browser movies , book/cancel tickets) and Admin (manage movies, shows, seats, monitor bookings). Built with JWT authentication, role-based access control, rate limiting, file upload, aggregation analytics, and full Monsoon schema design.
- **Learning management System (Express.js)**
Backend LMS using Express.js to manage users, courses, and enrollments with RESTful APIs and middleware for efficient request handling.
- **To-Do List REST API**
RESTful API for task management with full CRUD operations. Tested all endpoints with Postman to ensure correct functionality and error handling.
- **CLI-based Learning Management System**
Command - Line LMS to manage courses and students data through terminal interactions, focusing on core logic and data handling.
- **Portfolio Website**
Responsive portfolio website with dark mode, animations, project filtering, contact form , and smooth scroll - built entirely from scratch without frameworks.

Personal Details

- GitHub : https://github.com/sonikaa2005/MERN_Stu_FebMay26Mys

Certificate

- • Certified in C - QSpiders
- • Workshop Certification in Python
- Certified in Basic Computer Skills - Dream and Dream institute

Declaration

- I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
